

Water Cycle

Name: _____

Date: _____

Grade: Grade 1

Part A: Multiple Choice

Circle the best answer for each question.

1. What happens to water when the sun heats it?

- A) It freezes
- B) It evaporates
- C) It turns red
- D) It disappears

2. What is it called when vapor turns back into tiny drops?

- A) Evaporation
- B) Collection
- C) Condensation
- D) Melting

3. Where does most of Earth water collect?

- A) In clouds
- B) In the ocean
- C) On mountaintops
- D) In the desert

4. Which step of the water cycle makes rain or snow?

- A) Evaporation
- B) Collection
- C) Condensation
- D) Precipitation

Part B: Fill in the Blank

Write the correct answer on each line.

1. Evaporation happens when the _____ heats water.
2. Tiny water drops in the sky group together to form _____.
3. When clouds cannot hold more water, _____ falls.
4. After rain, water flows into rivers during _____.
5. The water cycle is powered by energy from the _____.

Answer Key · Water Cycle · Grade: Grade 1

Part A: Multiple Choice

Circle the best answer for each question.

1. What happens to water when the sun heats it?

- A) It freezes
- B) It evaporates
- C) It turns red
- D) It disappears

2. What is it called when vapor turns back into tiny drops?

- A) Evaporation
- B) Collection
- C) Condensation
- D) Melting

3. Where does most of Earth water collect?

- A) In clouds
- B) In the ocean
- C) On mountaintops
- D) In the desert

4. Which step of the water cycle makes rain or snow?

- A) Evaporation
- B) Collection
- C) Condensation
- D) Precipitation

Part B: Fill in the Blank

Write the correct answer on each line.

1. Evaporation happens when the sun heats water.
2. Tiny water drops in the sky group together to form clouds .
3. When clouds cannot hold more water, rain falls.
4. After rain, water flows into rivers during collection .
5. The water cycle is powered by energy from the sun .
